HIGHLIGHTS

- Alberta's international exports rose sharply by 72% to $18 billion in the first quarter of 2003, compared with the first quarter of 2002 – the highest growth rate of all provinces. Moreover, Alberta's increase of $7.5 billion exceeded Canada's $7.3 billion increase.

- The growth in exports was mainly the result of strong oil and gas prices and increased volumes of natural gas, crude oil and gas liquids. Total export volumes (of all commodities) rose by just over 5% in the first quarter.

- Natural gas exports increased by 166% to $8.7 billion, mainly as a result of higher prices, although volumes were also significantly higher. Crude oil shipments rose 89% to $4.3 billion, as both prices and volumes rose strongly. Exports of natural gas liquids nearly doubled. Other commodities with strong growth include refined petroleum products (such as gasoline and fuel oil), ethylene polymers, nickel, sulphur and polyethylene.

- Exports of telecommunication equipment continued to fall. Also lower were grain (wheat, durum wheat and barley) exports, mainly as a result of last year's drought, along with exports of coal, acyclic hydrocarbons (mtbe) newsprint, lumber and oriented strand board.

- The energy and mining industry saw its exports more than double to $13.7 billion, but manufacturing exports were down 1.7%, and primary agricultural exports declined by 29%, largely because of the drought. The following manufacturing sectors grew strongly: refined petroleum products and primary and fabricated metals. At the same time, exports of the computers & electronics (mainly telecom equipment), wood products, transportation equipment and pulp & paper sectors experienced sharp declines.

- Driven by the strong growth in the energy industry, exports to the US rose by 83%. Exports to Asia, Western and Eastern Europe, Central America and Oceania were also higher. However, exports to South America were down moderately while those to the Middle East and Africa tumbled.

- Besides the US, other major Alberta markets with strong growth include China (up 18%), Taiwan (up 53%), Belgium (up 57%), the Netherlands (up 39%) and Thailand (up 85%). But exports declines were posted to Japan (down 12%), Mexico (down 14%), South Korea (down 27%) and Germany (down 17%).

Total Exports to the USA (excl. Oil & Gas)	**14,493,848**	**13,337,910**	**-8.0%**	**3,239,334**	**3,053,288**	**-5.7%**

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.

** Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.
